Subject: NEW CLINIC - JUNIPER HEALTH AND WELLNESS

Hello!

When you were part of ThriveMed, you had a unique place you could go for real answers, guidance, and care you could trust. That philosophy has not gone away - it has evolved.

Juniper Health and Wellness is a new practice built on many of the same values patients appreciated most. Juniper expands that model with a new office and additional wellness and regenerative services - all designed to support how you feel, function, and recover.

As a Juniper member, you have all of the things you valued before and:

- Weight and hormone management
- Longevity guidance for a more healthy and active lifestyle
- Expanded services like aesthetics, muscle and soft tissue treatments, IV therapies, and lifestyle coaching

Our goal is simple - to give you a trusted place to turn to again, with more tools and support than before.

To learn more or to get started, please call 262.643.4900 or email hello@juniperbewell.com. In celebration of our health and wellness partnership, we are pleased to offer one of our new services complimentary with your membership at our new location.

We are excited to welcome you to this new chapter and please watch for additional Juniper Health and Wellness emails.

The Juniper Team
